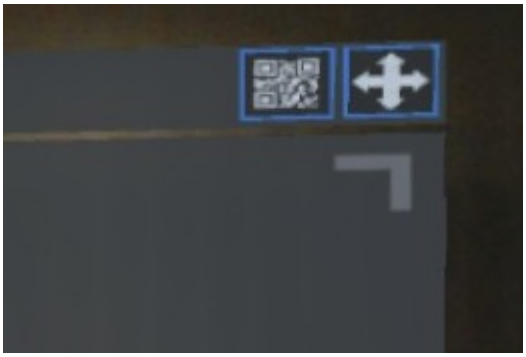
# HoloMeeting-Client

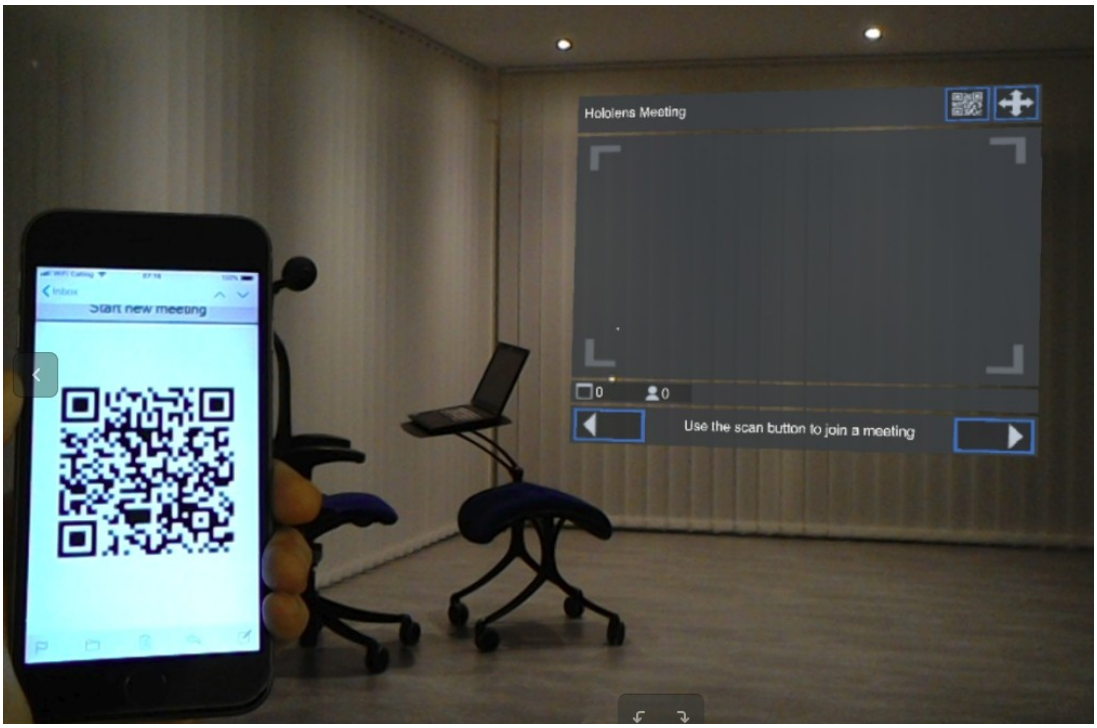
## How to join a meeting

Launch the HoloMeeting-Client application on your HoloLens and wait for the presentation screen to appear.

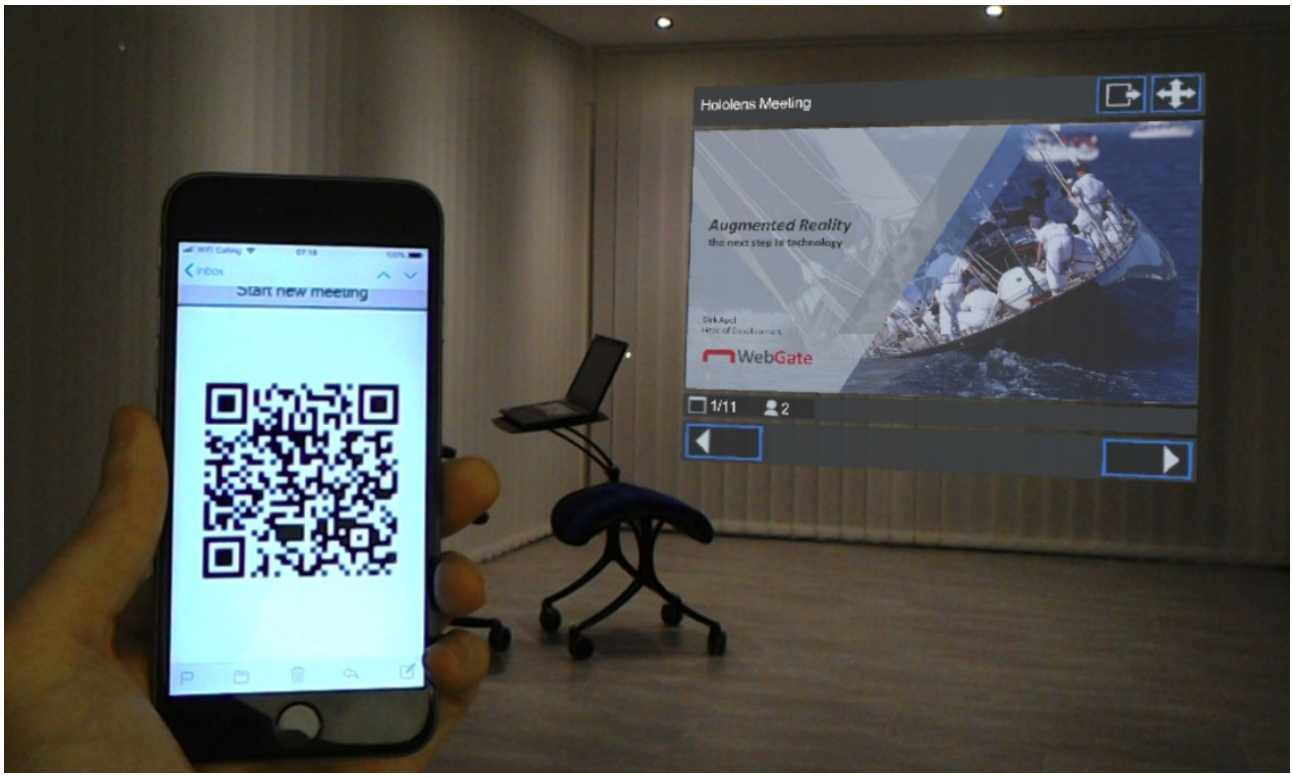
Place the virtual presentation screen on a wall in your room by grabbing the “move” icon in the upper right corner.



To join a meeting, click the “QR-Code” icon in the upper right corner and look at the QR-code meeting invitation you received from the meeting chair.



Once you are connected to the meeting, the slides will appear on the presentation screen.



You can now see the number of connected attendees and the slide number.
Slides will change automatically when the meeting chair switches back and forth.

Please note that if you use the forward/backward buttons to switch slides, this will change the slides for all meeting participants. Functionality to lock and release controls for “view-only” attendees is not yet present in this version of the HoloMeeting-Client.
